Sirius USB Headset Series – User Guide

Congratulations on choosing the Sirius USB Headset made by Telekonnectors, India's Headset Technology Pioneer. This headset is designed for voice application on soft phones.

Sirius Binaural NC USB headset

Features

1. Professional grade enterprise communication headset with noise cancellation mic

2. Both monaural and binaural style headset available with single cable design

3. Available in Type A or Type C USB connectivity

4. Compatible with Win 10/Win 11 and Linux

5. Plug and Play operation

6. Call Control function for specific applications with LED indication (Active – blue)

7. Digital volume control – adjusts receive volume levels for comfortable listening

8. Mic mute function for disturbance free, private aside conversations with corresponding LED indication (Active – red)

Operation - Basics

Connect the Sirius USB Headset to your PC/Laptop USB port. The driver will be installed automatically.

Mic Mute

Volume Control

Call Control

Check the operation by making a call on the softphone via Sirius USB Headset. Press the mic mute button, the LED will glow in red and verify whether the caller cannot hear your voice. To release mic mute, press the mic mute button again.

The call control button can be used to attend/end calls directly by using the interface instead of the soft phone application. To test the same, make a call to the softphone application and attend the call by pressing the call control button.

Once the call is completed, press the call control button to end the call.

You can adjust the caller's voice to your comfort level by using '+' button that increases the receive volume level and '–' button that decreases the receive volume level.
